

## Storengy Deutschland marketing a working gas volume of 450 GWh in the storage facility in Lesum

Berlin, 23 April 2021. In the coming weeks, Storengy Deutschland GmbH will be marketing a working gas volume of around 450 GWh in the storage facility in Lesum.

The **Lesum 21/23 Product** is being offered for a contract period from 1<sup>st</sup> June 2021 to 1<sup>st</sup> April 2023. It consists of nine bundles; each bundle has a firm working gas volume of approx. 50 GWh as well as a firm injection rate of 25 MWh/h and a firm withdrawal rate of 70 MWh/h. No operational fee is charged for the first filling for each respective storage year. Thereafter, a fee of 0.50 EUR/MWh is charged for injection. For this product, customers must book transport capacities by themselves. A fixed storage price in EUR/MWh per storage year will be requested. Injection and withdrawal curves have to be considered.

For this Lesum product, the **Green Storage Option** can be booked for an additional fee of 0.10 EUR/MWh. This means that all the energy needed to operate this product comes from renewable sources: renewable electricity is used for the injection and biogas is used for the withdrawal of gas. This enables CO<sub>2</sub> savings and ensures a green value chain.

In order to participate in the tender, a (non-binding) registration per email at [auctions@storengy.de](mailto:auctions@storengy.de) is mandatory. Please send your registration by 30<sup>th</sup> April 2021, 2 p.m. (CET). The **capacity marketing will take place between 4<sup>th</sup> May 2021 and 20<sup>th</sup> May 2021**. The exact date of marketing will be announced with one day's notice.

Further information on products, services and marketing can be found on our website under "[Natural gas storage](#)".

### About Storengy

Storengy Deutschland is one of the largest natural gas storage companies in Germany. It is a subsidiary of Storengy SAS, which bundles the ENGIE group's global gas storage activities. Storengy is the market leader for storage services in Europe. Its core business includes the planning, construction and operation of storage facilities and the marketing of gas storage capacities. Storengy Deutschland GmbH operates six gas storage facilities across Germany and markets their gas storage capacity. Storengy Deutschland Betrieb GmbH, a 100% subsidiary of Storengy Deutschland GmbH, implements the technical operation of the gas storage facilities and also provides services (operation and maintenance) for third-party facilities. A central control room in Hanover ensures the remote operation of technical facilities. The company's headquarters are based in Berlin. As an innovative partner for the zero carbon transition, Storengy provides its expertise to numerous partners worldwide to develop geothermal projects (heat and power production) as well as energy storage and power-to-X solutions.
