

## **Capacity marketing: Harsefeld High Performance Product**

Berlin, 7 July 2021. On 8 July 2021, Storengy Deutschland GmbH will be marketing a working gas volume of approx. 100 GWh in the storage facility Harsefeld (market area: GASPOOL, Trading Hub Europe).

The Harsefeld High Performance Product is being offered for a contract period from 1 August 2021 to 1 April 2022. It consists of a single bundle with a firm working gas volume of approx. 100 GWh as well as a firm injection rate of 280 MWh/h and a firm and interruptible withdrawal rate of each 280 MWh/h. No injection or withdrawal curves have to be considered.

Storengy Deutschland offers a value sharing price which means that there is no fixed price but customers and Storengy will share the profit (after deduction of all costs) that the customers generate with this product.

Bids for the product can be submitted until 8 July 2021 3 p.m. (CET).

Further information on products, services and marketing can be found on the website under "Natural gas storage".

## **About Storengy**

Storengy Deutschland is one of the largest natural gas storage companies in Germany. It is a subsidiary of Storengy SAS, which bundles the ENGIE group's global gas storage activities. Storengy is the market leader for storage services in Europe. Its core business includes the planning, construction and operation of storage facilities and the marketing of gas storage capacities. Storengy Deutschland GmbH operates six gas storage facilities across Germany and markets their gas storage capacity. Storengy Deutschland Betrieb GmbH, a 100% subsidiary of Storengy Deutschland GmbH, implements the technical operation of the gas storage facilities and also provides services (operation and maintenance) for third-party facilities. A central control room in Hanover ensures the remote operation of technical facilities. The company's headquarters are based in Berlin. As an innovative partner for the zero carbon transition, Storengy provides its expertise to numerous partners worldwide to develop geothermal projects (heat and power production) as well as energy storage and power-to-X solutions.
