

Storengy Deutschland signs contract with Vermilion Energy Germany for providing digital services for plant operations

Hanover, 13 October 2021. Storengy Deutschland is entering into a contract with Vermilion Energy Germany to provide digital services for controlling and monitoring Vermilion's operational plants in Lower Saxony as permanently manned facilities (PMFs).

Storengy Deutschland will ensure 24/7 remote operation from its central control room in Hanover. The service portfolio includes controlling automated processing plants and wells, monitoring alarm, warning and fault messages, troubleshooting and initiating alarm chains.

The company draws on digital technologies and state-of-the-art processes to optimise operations and maintenance activities, and make them as efficient as possible. "With our central control room, we're providing modern operational management as well as improved performance for our customer, and are thus making an important contribution to the energy supply," says **Torsten Bührig, Division Manager Technical Dispatching at Storengy Deutschland**.

Andreas Gobi, Production Superintendent at Vermilion Energy Germany, is very confident about this collaboration: "For monitoring our facilities, we're calling on the expertise and professionalism of an established player in the energy sector. The decisive factor for this collaboration was Storengy's industry experience and its state-of-the-art central control room, which meets our high quality and safety standards in every respect." Remote monitoring is introduced in addition to operational and plant control by Vermilion personnel, further enhancing plant safety.

About Storengy

Storengy Deutschland is one of the largest natural gas storage companies in Germany. It is a subsidiary of Storengy SAS, which bundles the ENGIE group's global gas storage activities. Storengy is the market leader for storage services in Europe. The company's core business includes the planning, construction and operation of storage facilities and the marketing of gas storage capacities. Storengy Deutschland GmbH operates six gas storage facilities across Germany and markets their gas storage capacity. Storengy Deutschland Betrieb GmbH, a 100% subsidiary of Storengy Deutschland GmbH, implements the technical operation of the gas storage facilities and also provides services (operation and maintenance) for third-party facilities. A central control room in Hanover ensures the remote operation of technical facilities. The company's headquarters are based in Berlin. As an innovative partner for the zero carbon transition, Storengy provides its expertise to numerous partners worldwide to develop geothermal projects (heat and power production) as well as energy storage and power-to-X solutions.

About Vermilion Energy

Vermilion is an international energy company engaged in the exploration, development, production and optimisation of natural gas and oil fields in North America, Europe and Australia. Founded in 1994 in Calgary in the Canadian province of Alberta, the company can now look back on a successful 25-year history with around 970 permanent employees. In Germany, Vermilion has been involved in production since 2014 and in exploration since 2016. With the acquisition of its own natural gas and oil production sites, it has also been an operator since 2017 in Germany and has strengthened this position acquiring further natural gas and oil fields in 2021.
